¹ 4” Sphere Code spacing requires that a 4” ball cannot fit through any spacing between balusters.
² Common [non-code] spacing can be used in non-access applications or when spacing codes are not required.
³ Building codes for residential installations of balusters are typically specified at 36” in height.

</table>
CODE & HEIGHT CONSIDERATIONS

In some locales the Residential Building Code may require a balustrade height of greater than 36”. In these instances the Extended height balusters and Newel Posts may be necessary.

It is the customer’s responsibility to determine and meet all applicable building codes.

RAILINGS

Spindle Baluster Railing
